

Product Data Sheet

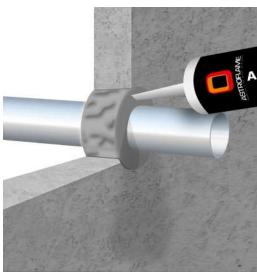

Astro PFP FR Graphite

High Pressure Sealant

- Classified in most constructions for plastic pipes, cables and combustible pipe insulations.
- Easy to apply.
- · High sound insulation.
- · Low emissions environmentally and user friendly.
- Simple to apply with a smooth surface finish.
- Permanently flexible will accommodate movement up to 12.5%.
- No priming necessary for application to most materials; see the installation instructions for further details.
- Suitable for most surfaces, included concrete, bricks, Leca, steel, wood, gypsum, glass, plastics and most non-porous surfaces.
- Hardens quickly, tack free after 1 hour.
- The fire performance specification of the joint filler has been derived when the joint filler has been allowed to cure for 30 days.
- Minimum 12 months storage time.
- 30 years working life.

Product Description

Astro PFP FR Graphite is a high specification formulation designed to prevent the spread of fire, smoke and gases through openings in fire rated walls and floors. Astro PFP FR Graphite expands when it is subjected to fire and closes openings around penetrations when any combustible or low temperature melting materials have burnt away.

Astro PFP FR Graphite is designed to fire seal difficult services which traditional fire rated mastics do not achieve such as large plastic pipes.

Astro PFP FR Graphite can be used with a suitable filling material, i.e. stone wool or Astroflame Backing material in order to ensure correct width to depth ratio and to reduce the shrinking of the sealant during curing. Minimum depth and maximum width of the joints are included in the installation instructions. Thermal activation takes place at 150 °C when the material will expand (intumesce) to prevent the passage of fire and smoke for periods up to 4 hours.

Astroflame Fireseals Ltd Unit 8 I.O Centre Stephenson Road Segensworth, Fareham Hampshire, PO15 5RU

CE-2531-CPR-CXO10380 CE-ETA - 22/0638 ASTRO PFP FR GRAPHITE "See ETA - 22/0638 for relevant characteristics"

Sound Insulation

Description	Sound reduction
Single sided seal ≥ 25mm depth	Rw 53 dB
Double sided seal ≥ 25mm depth	Rw > 53 dB

Astro PFP FR Graphite has been tested at EXOVA BM Trada (UKAS accredited); according to EN ISO 10140-2:2010. Usage of any backing material is optional, due to the tests being conducted with sealant only.

Emission data (indoor air quality)

Compound	Emission rate after 3 days	Emission rate after 4 weeks
TVOC	51 μg/m³	20 μg/m³
TSVOC	< 5 μg/m³	< 5 μg/m³
VOC w/o NIK	< 5 μg/m³	< 5 μg/m³
R Value	0.17	0.14
Formaldehyde	< 3 μg/m³	< 3 μg/m³
Acetaldehyde	< 3 μg/m³	< 3 μg/m³
Carcinogenic	< 1 μg/m³	< 1 μg/m³
n.d. or < means not detected		

Regulation or Protocol	Conclusion
French VOC Regulation	A+
French CMR components	Pass
Italian CAM	Pass
ABG / AgBB to the guidelines of DIBt	Pass
Belgian Regulation	Pass
EMICODE	EC 1 PLUS
Indoor Air Comfort GOLD®	Pass
Blue Angel (DE-UZ 123)	Pass
BREEAM-International	Exemplary Level
BREEAM-NOR	Pass
LEED v4.1	Compliant

Astro PFP FR Graphite has been tested by Eurofins Product Testing; reports available upon request.

Pipe end configurations

When testing pipes, one can choose not to cap (or close) the pipe, or cap the pipe inside the furnace, or outside the furnace, or on both sides. The configuration chosen depends on the intended application of the pipe and/or the installation environment. The code defining if a pipe is capped is stated after the fire classification. For instance EI 60 C/U which means the pipe was capped inside the furnace, and uncapped outside the furnace. The test configuration defines the approvals possible.

Our engineering judgment based on EN 1366-3:2009 are:

Intended use of pipe		Pipe end condition 4)
Deinverten nine uleetie	At drainage	U/U ¹⁾
Rainwater pipe, plastic	Not at drainage	C/C ²⁾
Drainage or sewage pipe, plastic	Ventilated drain	U/U 1)
	Unventilated drain	U/C 1)
	Drain w/water trap	U/C 1)
	Not at drainage	C/C ²⁾
Pipe in closed circuit (water, gas, air, electricity etc.)		C/C ^{2) 3)}
Flue gas recovery system pipe, plastic		U/C 1)
Pipe with open ends and ≥ 50cm length on both sides, plastic		U/U ²⁾
Ding a unparted by a upper parter a protect of	Fire rated support	C/U 1)
Pipe supported by suspension system, metal	Non-fire rated	U/C 1)
Waste disposal shaft pipe, metal		U/C 1)

¹⁾ Suggested in EN 1366-3:2009. ²⁾ Astroflame's judgment based on tests.

Air Permeability

Positive Pressure (Pa)	Leakage (m³/h)	Negative Pressure (Pa)	Leakage (m³/h)
25	0.00	25	0.00
50	0.00	50	0.00
100	0.00	100	0.00
200	0.00	200	0.00
300	0.00	300	0.02
450	0.03	450	0.06
600	0.13	600	0.12

Astro PFP FR Graphite has been tested at Warringtonfire Testing and Certification Ltd (UKAS accredited); according to EN 1026: 2016.

³⁾ Metal pipes should have fire rated support. ⁴⁾ U/U classified fire seals cover C/U, U/C and C/C. C/U classified fire seals cover U/C and C/C. U/C classified fire seals cover C/C.

Installation

We have technical representatives who provide assistance in the selection and specification of the products on this site and should be consulted for exact installation and product suitability. Ensure an early engagement with ourselves, designers, main contractor and specialist installers before any installation. Other trades and/or manufacturers may need to be consulted. For in-depth information, specification and technical advice please call our Head Office on tel <u>01329 844 500</u> or email <u>sales@astroflame.com</u>

Maintenance

All interested parties, designer, specifier, main contractor and specialist installers should provide access to allow the fire stopping seals to be regularly inspected and maintained, as well as records kept of such maintenance at minimum periods of 12 months, as required by the Regulatory Reform Order, and repaired if necessary. Reference should be made to ASFP TGD 17 – Code of Practice for the Installation and Inspection of Fire Stopping.

Competency

It is vital that those entrusted to design or install a fire stopping product have the necessary levels of competence to undertake the task professionally and thoroughly. The level of competency required will be commensurate with the expected complexity of the building. All designers must eliminate, reduce or control foreseeable risks that may arise during installation, construction or maintenance when preparing or modifying designs. Clients should ensure that the principal designer and principal contractor carry out their duties under CDM regulations. The ASFP foundation course in passive fire protection provides essential knowledge as part of demonstrating competency and understanding in this key fire protection specialism.

Additional Notes

Please refer to the ETA/UKCA sheet for fields of application for this product. For further information on installation requirements please refer to the manufacturer of the services and the wall/floor specification to ensure the compatibility of this product, if in doubt please contact the technical team with services and wall/floor specification on: T: <u>01329 844 500</u> or E: <u>sales@astroflame.com</u>

Health and Safety

Please see (SDS) Safety Data sheet - This can be requested from our sales team T: <u>01329 844 500</u> or E: <u>sales@astroflame.com</u>

As part of our policy of ongoing improvements, we reserve the right to modify, alter or change product specifications without giving notice. Product illustrations are representations only.
