

# SIDERISE PF Roll – Polyester Fibre Roll

SIDERISE PF Roll is a flexible polyester fibre insulation.

## Description

Siderise PF Roll is a 100% polyester thermally bonded insulation material.

## Technical specification

|                      |   |
|----------------------|---|
| Material             | 15 Denier thermally bonded polyester fibre  |
| Roll length          | 10m   |
| Roll width           | 370mm   |
| Thickness            | 50mm  |
| Roll diameter        | <460mm  |
| Surface Mass         | 700g/m <sup>2</sup>   |
| Thermal conductivity | 0.048 W/m.k (ISO 8301 @ 10°C mean temperature)  |
| Flammability         | Conforms to the requirements outlined in The Furniture and Furnishings Fire Safety Regulations Schedule 2, part 1. This is the chair test conducted as a single filling under DTI fabric.<br>ISO3795/ FMVSS302 – average burn rate 00mm/min |
| Cleanliness          | This product conforms to the requirements of BS1425: Part 1:1991, specifications for Cleanliness of fillings and Stuffings  |
| Recycled content     | ≥80%  |
