

ResoDeck 28PRO

Product Information & Technical Data Sheet

Resonate's **ResoDeck 28PRO** is a high performance acoustic flooring solution suitable for use on timber and concrete separating floors. The composite acoustic overlay panel is laid as a floating floor on top of the timber or concrete sub-floor, before the final floor coverings (carpet, laminate etc) are installed.

Easy Install Soundproofing

The 28mm thick **ResoDeck 28PRO** panels have minimal impact on floor height. The 18mm (22mm option available) P5 chipboard top layer is technically bonded to 10mm **ResoFleece** a high performance fibre resilient layer.

The **ResoFleece** resilient layer provides superior impact sound reduction, making it ideal for residential properties that require excellent reduction of foot fall noise. The tongue and groove edge detail allows for fast and simple installation, perfectly suited for refurbishment applications.
