

HARDWOOD PIPE SUPPORTS

Product Description

Hardwood pipe support blocks are manufactured from FSC certified hardwood in a wide range of pipe diameters and thicknesses. Hardwood blocks are supplied with or without foil wrap vapour seals and trace heating slots can also be specified.

Applications

Hardwood blocks are used with LTHW and CHW pipework systems to support the compressive loads of the pipework while preventing contact between the pipe and the pipe supports and providing a degree of insulation. Hardwood blocks have good compressive strength making them suitable for large pipe diameters.

Product Data

Timber: Ayous FSC Mix 70%

FSC Certificate number: FSC-C132546

Foiling: Class 'O' aluminium foil

Pipework Temperature: Max 100°C

Block Length: 92mm

FSC® - the Forestry Stewardship Council is an independent organisation that promotes sustainable management of the world's forests. MIDFIX are certified with the FSC® for manufacturing and supplying FSC® certified pipe support blocks. This guarantees our pipe supports are manufactured using timber from sustainable sources.
