

Aluflow® : Gutter Deepflow Running Outlet

The Aluflow® Running Outlet is designed as a high capacity outlet for high volumes of water. The Aluflow® Running Outlet also Rock N Locks in to the Aluflow® Rock N Lock® Gutter Brackets providing excellent strength and alignment. Aluflow® Downpipe then slots on to the lower outlet to allow control and direction of the rainwater.

The Aluflow® Gutter Running Outlet requires a Gutter Union either side to join to the following guttering component.
